

The Streamery Safety Video Library

ABA Insurance Services' Property & Casualty policyholders have access to a vast library of streaming video and training content provided through Streamery. The library is an excellent supplement to our policyholders' overall safety and risk management programs.

Library Overview

Great American's safety video library includes over 250 training programs relevant to financial institutions, covering a wide variety of hazard-specific topics, categorized in the online library to facilitate browsing by hazard or operation. Content ranges from OSHA compliance and employee safety to driving and driver issues and human resources and management topics.

Each training topic contains a video that may be streamed using a built-in, user friendly media player with closed caption capability in both English and Spanish. Many topics come with downloadable and editable course materials in a Zip file that include course leader guides, course completion certificates, sign-in sheets, and post-video training quizzes and answer keys. Videos are best streamed using Google Chrome, Microsoft Edge, Firefox or mobile phone browsers.

Videos may be presented in a classroom setting with a moderator to record attendance and facilitate.

Categories include:

- Driver and Vehicle Safety
- Ergonomics and Strain Prevention
- Facilities and Premises Safety
- Fire Safety and Extinguishers
- First Aid
- HR Related Topics, such as compliance and employee relations
- Leadership and Culture
- Personal Protective Equipment (PPE)
- Slips, Trips and Falls
- Workplace Security and Harassment Prevention

Many more topics are available to help you and your team prevent loss and be safe.

To setup your account and access the Streamery, send a request to LCVideos@gaig.com.

Please include your name, company name, email address and policy number.
