**Cyber insurance** protects businesses from computer, network, and internet based risks. The policy covers both first- and third-party loss. Businesses that use the internet and email, accept credit cards, or use a system network most likely need cyber insurance.

Our history with cyber insurance dates to 2001. With deep institutional knowledge, **ABA Insurance Services** offers the coverage and claims expertise needed to help protect against today's exposures.

## CYBER RISK SECURITY RESOURCES

Great American policyholders have access to an Incident Consultation Hotline, eRiskHub® powered by NetDiligence®, and SecurityScorecard. When a cyber event occurs, time is of the essence. Having a plan in place with access to the third-party resources your client needs can help them efficiently and cost-effectively respond and recover.

**Incident Consultation Hotline** | The Incident Consultation Hotline provides access to Great American's cyber experts in the event of actual or suspected privacy and network security incidents. This consultation will help your client decide what next steps are necessary including whether or not an incident notice to our claims department is necessary.

**eRiskHub®** | The eRiskHub® portal provides your client tools that will help them assess their risk and prepare for and/or modify their response plan. eRiskHub® resources include:

- Incident Response Plan Templates
- Approved Third-Party Vendors
- Articles & Whitepapers
- Cyber News & Blogs
- Videos & Webinars
- Tools & Calculators
- Best Practices Checklists
- Cyber Risk Assessments

**SecurityScorecard** | All insureds can request a SecurityScorecard that rates your client's security environment by assessing the company's domain and using key clues on their website. The report covers ten different security areas and provides action items to help improve your client's security profile.

**ProCision®**
